

**WHAT IS EPILEPSY?
POST TEST**

1. *Seizures may be triggered or initiated by:*
 - A. *cardiac arrhythmias*
 - B. *hypotension*
 - C. *hypoglycemia*
 - D. *all of the above*

2. *When they are recurrent and secondary to intrinsic cerebral cortical activity it is Called:*
 - A. *absence*
 - B. *tonic-clonic*
 - C. *epilepsy*
 - D. *simplex*

3. *A patient with a seizure history will ALWAYS have a warning sign of an aura or something similar.*
 - A. *True*
 - B. *False*

4. *Which type of seizure involves bilateral and symmetrical rhythmic movements in an unconscious patient:*
 - A. *Simple*
 - B. *Myoclonic*
 - C. *Typical*
 - D. *Generalized tonic clonic*

5. *The violent flexing and jerking of the body during a seizure is:*
 - A. *Complex*
 - B. *Simple*
 - C. *Tonic*
 - D. *Tonic clonic (grand mal)*

6. *Generalized seizures may be convulsive:*
 - A. *tonic*
 - B. *clonic*
 - C. *tonic clonic*
 - D. *all of the above*

7. *Consciousness is always lost in a generalized seizure.*
- A. *True*
 - B. *False*
8. *What type of seizure involves movements of one limb or one part of the body while the patient is fully aware of what is occurring:*
- A. *Simple*
 - B. *Complex*
 - C. *Partial seizures*
 - D. *Tonic-Clonic*
9. *If consciousness is impaired during a seizure it is known as:*
- A. *complex partial*
 - B. *Simple*
 - C. *Partial seizures*
 - D. *All of the above*
10. *Persons with febrile convulsions are at increased risk for the development of Epilepsy.*
- A. *True*
 - B. *False*
